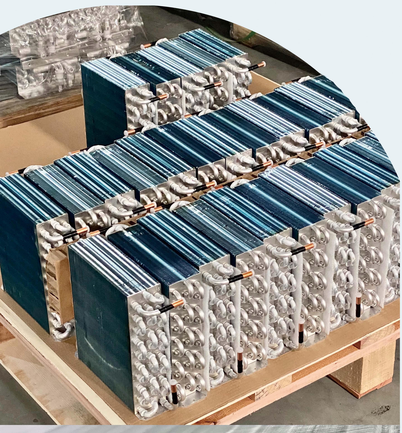
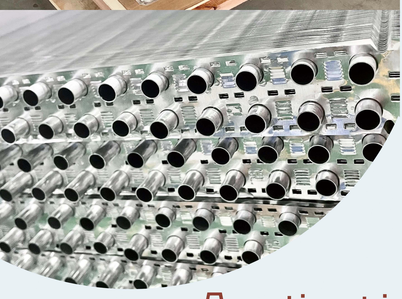
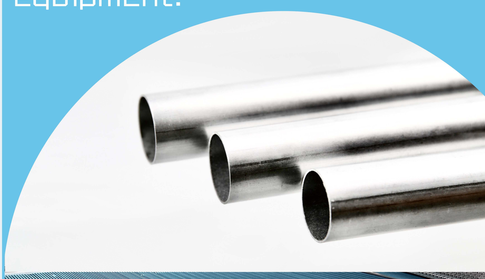
Heat Exchanger Aluminum Tube

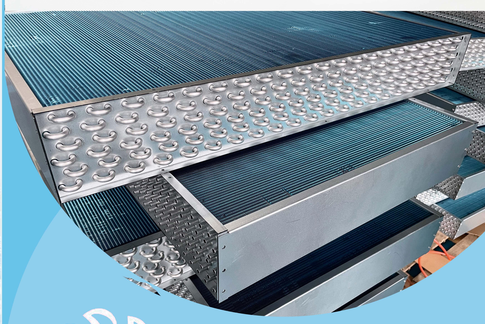




Product Description

Mainly used in all kinds of refrigeration and exchange tubes of heat exchange equipment.





Applications

Condenser

Evaporator

Small Heater

Home freezer

Industrial freezer

AC connecting pipe

Automobile water tank connecting tube

Microchannel heat exchanger connecting tube

YUNNENG
允能智造 节能新材

Features

Easy to clean:
Smooth inner wall, not easy to accumulate dirt.
high heat transfer efficiency.

comparative advantage:
In applications where light weight is required, Aluminum is an excellent choice.

Special anti-corrosion technology:
Surface zinc spraying, passivation or internal oiling to cope with it.

Techical Parameters

	State	Model Number	Outside Diameter /mm
example	H14,H12, O,H112	Series 3	5-35

Wall Thicknes s/mm	Length/mm	Number of tubes	Shipping Method s
0.24-3.0	150-15000	customi zable	Coil or Stright
